GRASS

Cleaning products · SOMVITAL S.L., Spain

Purpose

Alkaline foam cleaner for washing buildings, equipment and vehicles in livestock production and the food industry. The stable foam clings to walls and ceilings and softens organic soiling before disinfection.

Specifications

COMPOSITION	Anionic surfactants, amphoteric surfactants, water to 100%.
SHELF LIFE AND STORAGE	36 months from manufacture. Store in a dry, cool, well-ventilated place in the original packaging.
PACKAGING	Plastic canisters of 20 kg.

Label application regimes

TASK	CONCENTRATION	PRODUCT PER 10 L OF WATER	APPLICATION RATE	CONTACT TIME
Routine washing, fresh soiling	1%	100 mL	0.1-0.15 L/m²	5 min
Washing between batches	2%	200 mL	0.1-0.15 L/m²	5-10 min
Dried-on organic soil and grease	3-4%	300-400 mL	0.1-0.15 L/m²	10 min

Preparation and use

Measure out the required amount of product, add it to the water and stir until fully dissolved. Prepare only as much solution as you will use, and apply it to clean surfaces after dry cleaning and washing: organic soiling reduces the action of the active substance.

The foam rate of 0.10-0.15 L/m² is a guide for foam application; check it against your foam unit.

Safety

> Wear protective gloves and goggles, and a respirator where needed. Do not eat, drink or smoke while working, and wash your hands afterwards. Do not mix the product with other products unless the label says so. Keep it in the original packaging out of reach of children and animals.

Prepared by WellFarm LLC from the manufacturer's instructions for convenience. Before use, read the label and instructions on the product packaging and follow the safety requirements. Regimes for notifiable diseases are agreed with the veterinary service.
